[PATENT RIGHTS]

TYNECASTLE CANVAS.

"Tynecastle" Canvas is the invention of Wm. Scott Morton, and derives its name from the district in Edinburgh where it is produced. Its distinctive merits are the artistic surface, unequalled colouring qualities, and the soundness and good-working nature of its fabric.

TYNECASTLE VELLUM.

"Tynecastle" Vellum is an inexpensive material of a texture resembling vellum, in which most of the "Tynecastle" designs are produced.

TYNECASTLE TEXTURE.

A new fabric specially suitable for picture backgrounds.

TYNECASTLE LEATHERS.

A revival of old styles of wall decoration in exclusive designs.

TYNECASTLE MOSAICS.

"Tynecastle" Mosaic panels are illustrated on pages 205 to 208. They consist of specially prepared frames, mounted with canvas panels, into which are inserted lustrous tesserae of a thin, new, vitreous mosaic, producing the luminous effect of colour so well known in fine old mosaic work.

WOOD MOULDINGS AND CORNICINGS.

The TYNECASTLE Co. supply Wood Mouldings to the sections indicated on pages 190 to 193 or any section required: also circles of cross-banded wood, squares, and octagons, to any section of moulding. All the parts required in wood for a Ceiling design can be provided maltred ready for fixing, if a careful plan be given.

SHIP DECORATION—SALOON CEILINGS.

Panels, after being fixed, are sent to Tynecastle for mounting and decorating; or, if careful templates are sent, panels of any size can be supplied of seasoned material, decorated and ready for fixing.

SPECIAL DESIGNS.

Special Patterns can be prepared in about one month for the requirements of private firms and for special purposes, such as public buildings with heraldic devices, etc., for which estimates are given.

METHODS OF FIXING.

1. **FILLINGS.**—Trim the edges to the fine guide line, and, after applying a thin coat of ordinary flour paste, allow the piece to soften for six or eight minutes; then apply a stiffer coat of paste, when the material may be fixed. Care should be taken not to allow the piece to soften longer than stated, and in hanging, the material should not be strained. When the edges do not quite fit, the Canvas or Vellum may be stretched a little on each edge and temporarily held with tacks or needle points till set.

2. **FRIEZES AND CEILINGS** are fixed in the same manner as Fillings, a small quantity of glue being added to the paste where the relief is heavy.

Designs in bold relief are so modelled as to give an irregular scribing line, thus avoiding cuts through prominent features.

IMPORTANT.—All material sent out under a stiff coat of size, thus saving expense in decoration.

NOTE.

To avoid any misleading impression of the Patterns illustrated in this Catalogue, all have been reproduced from the plain material without the backgrounds having been picked in.

The Small Pattern Design T-4

Wm. Scott Morton's Patented
TYNECASTLE TEXTURE.

Illustrated on pages 32 to 34.

For Backgrounds

DECORATIVE TREATMENTS.

1. Col. Oiled, Stained, Glazed, Toned
2. Do. "Toned"
3. Clear Protected Glaze
4. Painted over, on
5. Painted and Toned
6. Painted on,

Make these treatments on the surface of the paper.

As the "Tynecastle Texture" resembles in height about a foot wall, the effect is obtained by using an embossed head at joint or back by means of hand or machine. Suitable heads are 3011, 3024, 3017. Also see patterns on page 35.

TWO INCH SCALE 1 2 3 4 5 6 7 8 9 10 11 12

A DINING-ROOM Ceiling in PLASTER-CANVAS Panels and Yellow Pine MOULDINGS.

Details to Scale, on preceding page

This Ceiling was completely decorated in our workshop and was screwed to prepared groundings in the house, the joints being covered with wood mouldings, all of which had been mitered and prepared for painting in the works. Five days of 4 good workmen sufficed to fix and finish the ceiling in the house. Size 34 ft. x 18 ft.

W. S. W. D.

Mounted PANEL specially designed for a heavily ribbed Ceiling, with
alternating centre pieces see next page.
